

THE PRICE IS IN EURO NOT IN DOLLAR.

A unique amplifier that first came up in a wood/inox version soon replaced by the cheaper black steel version SET 80. Produced at 10 pairs this Orfeo 60 is the only one that was ordered with mahogany plain wood on side instead of standard walnut.

This pair is like new and was rarely used because of inadequate loudspeakers. They were recently controlled, tested and upgraded to the latest version by Bel Canto. The Gold rings is not an option that I bought so they are not included but can be done by Bel Canto.

Class A, no feedback, unique gain stage, hand made output transformers, 4x ECC83 & 2x 845 each block for a unique power and low frequency extension.

These amps are the most natural and "full range" triode amps you ever heard beating any 300B in every way. Exceptional reliability and Bel Canto is stocking any part.

The ORFEO 60 develops its unusually high power for a single-ended triode amplifier with a unique Bel Canto circuit architecture which retains the strengths of single-ended amplifiers and balanced designs. The input transformer is used to generate perfectly balanced biphasic signals which drive separate 37 watt single ended amplifiers on each chassis sharing a common power supply. The outputs are then combined to generate double the power output. This circuit maintains the advantages inherent in single ended topologies and adds the advantages of class A balanced amplifier topologies.

Continuous power output into 4 or 8 ohms • 70 watts
Peak power output • 140 watts
Bandwidth • -3 dB 6 Hz - 35 kHz
Class of operation • Class A single-ended balanced 845 triode
Input level for 70 watts output • 2 Vrms
Signal to Noise Ratio re 1 watt out • 100 dB A weighted
Distortion at 1 watt / 1 kHz • <0.05% predominantly 2nd harmonic
Damping Factor • 3 across full bandwidth
Input configuration and impedance • 100K ohm single ended/balanced
Gain at 8 ohm tap • 18 dB
Power Requirement • 110-120 / 220-240 VAC; 50-60 Hz
400 VA per chassis
Size • 19.5" W x 15" D x 11" H each (496 mm x 381 mm x 280 mm)
Weight • 85 lbs each (39 kg)
PRICE NEW : 18 000 €
PRICE SOLD IN EUROS : 5 900 €
